

ABS-Like Resin for LCD DLP SLA 405nm White 1000g

[Read More](#)

SKU: 3DW3G7F5DZ7LK

Price: 317.27 DH (HT)

Stock: instock

Categories: [General Resins](#), [Resins](#)

Product Description

ABS like 3D Printing resin, great mechanical property and scratch resistance, and it is affordable resin among the strongest resins. If you are not sure which abs resin has better machinal property, then try jamghe art engineering like resin, it could meet all your requirements for miniature making or prototype etc. And it works perfect on any opensource **LCD printer**. Art engineering resin is hard tough with impact resistance 460J/M, allow you to do **peeling, punching, tapping, screwing etc.** it is the one for design office to make any prototype before manufacturing.

- High Precision and finest detail: Jamg he 10k Art-Engineering resin has great smooth surface and high accurate.
- Low Odor-10k Art-Engineering resin has much lower odor and less crack issue, it will let you more enjoy the whole printing process.
- Well Compatible with 2K 4K 6K 8K 3D printer 385-405nm in the market and wide use in varity area like home, office, school, etc.
- Fast curing and excellent stability: 10k Art-Engnieering resin can be fast printed 2-4s/each layer in LCD mono, and stable quality makes your every prints are successfully.
- High toughness resin, no easy break, best choice for figures and small tools accessories.

Precautions:

1. Fully shaking before usage, shake like up side down will be better.
2. Please Wear gloves and mask during whole print process to avoid skin contact directly, if you get the resin on your skin unfortunately, please wash with water immediately until

clean it up.

3. Resin is one kind of special chemistry product, please keep away from children, sunlight shining and dust.
 4. Brush it gently with a soft brush when model complete, and dry it up with cool wind, these steps will let you get the model in better condition

SKU: 3DWKW15H6YL4Z

Price: 226.36 DH (HT)

Stock: instock

Categories: [General Resins](#), [Resins](#), [Spare Parts](#)

Tags: [#dental](#), [resin](#)

Product Description

Cyan, Magenta, Yellow & Black Pigment Solutions. Use the CMYK pigment set to create custom colours. Before each use, shake well. Drip the pigment solution into Liquid Models 3D resin slowly and mix until the desired colour is achieved. Pigments added in excess can result in slower curing times and even prevent the cure completely. You can add the pigment solution to our white resin or to our clear resin depending on the finish you wish to achieve. When added to white resin, the result will be an opaque finish. When added to clear resin, the result will be transparent. The more pigment you add to the resin, the more solid the colour will be. Taking care with the pigments is extremely important, as they will stain easily. It is always recommended to read and understand the safety and technical information before using particle dispersions. **Package contents:**

- 1 x 30g Cyan Pigment
- 1 x 30g Magenta Pigment
- 1 x 30g Yellow Pigment
- 1 x 30g Black Pigment
- 4 x dropper lids

S200 Standard Resin, Light Brown

[Read More](#)

SKU: Light Brown

Price: 317.27 DH (HT)

Stock: instock

Categories: [General Resins](#), [Resins](#)

Product Description

eSUN's S200 Standard Resin is an easy-to-print resin with high rigidity and precision. The low-odour resin has excellent printing properties and combines fine surfaces with clear textures. Ideal for printing mechanical parts, figures, jewellery and decorations that require high accuracy.
