Product Description

Product Paramenters

7-Inch 9K Mono LCD	Mars 4 boasts a 7-inch 9K mono LCD that boasts an impressive 8520x4320 resolution and 18µm XY resolution, enabling you to print crisp and intricate models every time with every detail of your model accurately rendered.
Large Building Volume	The 153.36x77.76x175 mm ³ /6.04x3.06x6.89 inch build volume provides you with enough space for daily creations without sacrificing printing accuracy.
COB Light Source	The Mars 4 uses a powerful COB light source that uniformly exposes the beam of 405nm wavelength across the entire LCD, ensuring that your prints are consistent and accurate.
Laser-Carved Build Plate	The build plate has a laser-carved surface that provides excellent adhesion and ensures that models stick to the build plate during printing to improve the printing success rate.
User-Friendly UI	The 3.5-inch touch screen comes with a model preview function and a real-time progress bar that allows you to monitor the printing process and make adjustments as needed.
Upgraded Air Purifier	The upgraded air purifier has a plastic protective case to protect the built-in activated carbon filter, reducing resin odor during printing. The printer is also compatible with the upcoming ELEGOO Mars MATE air purifier, which can remove up to 95% of VOCs.

Open Source G00 S

The image shows a red and black ELEGOO MARS 4 3D printer on the left. To its right is a computer monitor displaying a 3D modeling software interface. The software window shows a 3D model of a complex, organic structure with red and blue mesh components. On the left side of the software window, there is a list of model statistics:

Model Statistics	
Model	MARS 4
Build Time	10:00:00
Build Cost	\$1.00
Layer	100
Volume	10.000 cm³
Weight	10.000 g
Platform Size	X: 10.000 cm, Y: 10.000 cm, Z: 10.000 cm

The monitor also displays the ELEGOO logo in the bottom right corner of the software interface.
